REG-Mobile Tornado Group New Agreement

Released : 23/10/2007

RNS Number:1624G
Mobile Tornado Group PLC
23 October 2007

Mobile Tornado Group plc
("Mobile Tornado" or "the Company")

MOBILE TORNAO SELECTED BY RADIOMOVEL TELECOMUNICACOES SA TO LAUNCH
"PUSH TO TALK" SERVICES IN PORTUGAL THROUGH ITS SUBSIDIARY ZAPP PORTUGAL

Mobile Tornado, one of the world leaders in convergent, instant communications, announces that Radiomovel Telecommunicacoes SA has signed an agreement to launch a Push-To-Talk ('PTT') service in Portugal through Zapp Portugal ("Zapp"), its Portuguese subsidiary. The solution, based on the Mobile Tornado IPRS platform, allows instantaneous communication on a nation-wide basis, utilising a one-to-one or one-to-many half duplex call. Zapp is the first CDMA450 operator to launch IPRS-based services in Europe.

Zapp intends targeting its PTT service at professional and corporate segments such as firefighters, law enforcement and security companies, municipal and community service providers and events companies. Zapp selected the IPRS solution package because of its quality and performance with the connection latency being lower and the voice quality superior compared to other solutions tested.

Besides the competitive advantages of the IPRS platform Mobile Tornado possesses significant experience in the field of solution integration with CDMA based networks, which allowed easy adaptation to Zapp's network characteristics and configurations.

Jeremy Fenn, Managing Director at Mobile Tornado said:

"I am delighted to announce this deal with Zapp. This launch demonstrates Zapp's commitment to delivering its subscribers options beyond traditional voice features by introducing a diverse suite of compelling, feature-rich data service offerings. This deal provides further evidence that our IPRS platform is gaining acceptance with mobile operators in territories around the world as they seek to launch 'Push-to-Talk' services to their customers. In recent weeks we have announced deals with mobile operators in Argentina, Israel and now Portugal. I look forward to further evidence of this increasing momentum in coming months."

Cuneyt Turkcan, president of the board of directors, Zapp, said:

"Zapp is proud to be the first CDMA450 operator to introduce IPRS-based services to the European market. Zapp subscribers will now benefit from an enhanced user experience that allows them to choose from a wide array of voice/data communication options. IPRS enables us to provide our clients with the necessary instruments to help them become more efficient and better informed. Mobile Tornado's IPRS solution positions Zapp as a technological leader and a cutting-edge mobile service provider."

About Mobile Tornado Group Plc

Mobile Tornado is a leading provider of instant communication solutions to mobile operators and enterprises throughout the world. The proprietary IPRS ('Internet Protocol Radio Service') technology platform that has been developed powers communication sessions which can instantaneously transmit voice, text or other data, and video clips with an easy-to-use, one-click, "push-to" button on the mobile phone. "Push-To" sessions can occur one-to-one, one-to-many, mobile-to-PC and PC-to-mobile, worldwide. The technology provides a real-time presence function to ensure users are able to see instantly whether their contacts are online allowing for more efficient and effective communication. Mobile Tornado sells software licences and services to mobile operators and enterprises worldwide through a number of distribution partners.
